PEH in LA: Building a More Realistic Estimate

Assumptions

- All PEH data likely underestimate actual population.
- Low estimate (first bar) based on PEH who access services from LA CoCs;
 PEH increased by 15% to recognize those who do not access CoC.
- Middle estimate (second bar) doubles
 PIT PEH count, based on expert
 opinion on size of PIT undercount.
- High estimate developed by the CA Policy Lab (third bar) uses more sophisticated assumptions.
